

EXAMPLES OF IMPRESS INTERIORS' PROVEN TRACK RECORD

Cobham plc. Dorset

"Impress Interiors worked with Cobham on the interior design of our new £13m office development in Wimborne, Dorset.

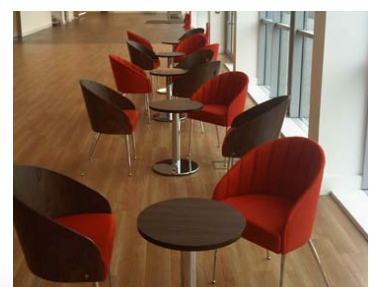

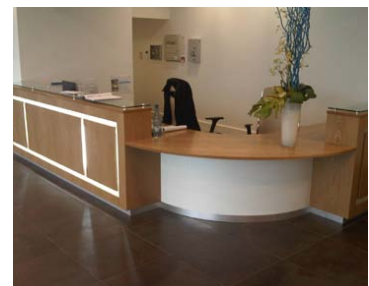

The team from Impress Interiors were very professional in helping us to design a suitable layout for the new offices, within a very tight budget that required us to reuse most of our existing furniture. They were also flexible enough to work with us amongst changing requirements which inevitably resulted in tight timescales to get furniture delivered and installed in time for the opening of the new office.

Impress were also able to provide interior design advice to the project team, which helped ensure that the end result was a professional working environment, without being too bland."

Mike Kelly
Senior Manager, Corporate Finance
Cobham plc

dar Lighting Ltd.

www.darlighting.co.uk

"On behalf of dār Lighting I would like to thank all at Impress Interiors for the help and assistance provided in completing the shop fit at Bedminster Bristol. Your time and advice was invaluable especially under the difficult circumstances created by situations beyond your control and outside your influence. This was compounded by the little knowledge I had of the requirements and the tight timescales demanded by dār lighting. The team and I here do recognise this and fully appreciate the effort and time that you and your team applied to this project and the patience you displayed in guiding us (me) through it. Although the shop did open a little behind schedule this can in no way be attributed to the team at Impress, the fact that it opened when it did can in a large way be attributed to you. All at dār are very pleased with the final product and with the finish on all the work, which is of a very high quality. Again this a credit to Impress considering much - if not all - of the work was completed without the basic facilities of power and water. If we have any projects of this nature in the future we will be in contact."
